

Add Silver Arbitration to your Google Ads Account

What we need to review

We need to prepare a detailed report of your total Google Search advertising spend since 2016 and identify the most recent terms and conditions accepted for your account.

How you can help

The easiest way to provide this information is to add **intake@silverarbitration.com** to your Google Ads account as a **read-only member**. A member of our team will then download the relevant information directly as needed.

Read-only access is sufficient.

Set Access Expires to 1 Year or longer.

Follow the two steps on the next pages to grant access.

Step 1: Add the allowed domain

Sign in to the Google Ads account you want to share, using an administrator login.

- A Open Security**
Go to **Admin > Access and security > Security**.
- B Add a domain**
Expand **Allowed domains**, then click **Add domain**.
- C Enter the domain**
Type **silverarbitration.com** in the new field. Keep the existing domains.
- D Save**
Click **Save** before continuing to Step 2.

The screenshot shows the 'Access and security' page in the Google Ads interface. The left sidebar contains navigation links: Create, Accounts, Campaigns, Goals, Tools, Billing, and Admin. The main content area is titled 'Access and security' and has tabs for Summary, Users, Managers, Related managers, and Security. The 'Security' tab is selected, indicated by an orange arrow labeled 'A'. Below the tabs, there's a section for 'Verification during sign-in' with '2-Step Verification' set to 'On - Required for this manager account'. The 'Allowed domains' section is expanded, showing a list of domains with 'silverarbitration.com' entered. An orange arrow labeled 'B' points to the 'Add domain' button. Another orange arrow labeled 'C' points to the 'silverarbitration.com' text field. At the bottom right, an orange arrow labeled 'D' points to the 'Save' button. The 'Set for' dropdown is set to 'This manager account and all accounts it owns'.

Add the domain first. Then invite intake@silverarbitration.com.

Step 2: Invite the read-only member

Read-only access is sufficient. Set Access Expires to 1 Year or longer.

A Open the invitation form

Go to the **Users** tab and click **+** to add a user. Confirm the correct account.

B Enter the email
intake@silverarbitration.com

C Set Access Expires
Choose **1 Year** or longer, or a date at least one year from today.

D Select Read only
Read-only access is sufficient. Standard or Admin access is not required.

E Send the invitation
Click **Send invitation**. Access begins once the invitation is accepted.
